

Holden Reservoir Inlet Pipeline Project

Project Update – January 2020

What to expect - Sanctuary Road

Works started at the Sanctuary Road roundabout on Tuesday 26 November and will be completed by Friday 31 January 2020.

For the safety of motorists and workers the roundabout at Sanctuary Road has been modified, including:

* The Regency, Hillside closed to traffic north and south bound from the roundabout.

* Modifications to the roundabout to enable machinery and staff to work in the roundabout

* Temporary traffic lights and pedestrian crossing installed adjacent to the roundabout across the Melton Highway

* Five bus stops along the 476 route temporarily closed as works are carried out at the roundabout. All bus stops on The

Regency, Sanctuary Road and Beattys Road will be closed. Passengers will need to catch the bus from Wattle Valley Drive, Hillside.

Earlier communication pieces provided to residents emphasised there would be no right hand turn from Sanctuary Road at the roundabout. This is no longer the case. The right hand turn from Sanctuary Road onto the Melton Highway is now accessible to motorists.

However, we recommend trucks and longer vehicles not use the right turn due to the reduced width of the turning lane.

What to expect - Gourlay Road/The Parks intersection

Works started along the median strip and intersection of Melton Highway approaching Gourlay Road and The Parks in November. We are moving along the media strip city bound and on the week commencing 10 February 2020 we will be closing the intersection of Gourlay Road/The Parks for up to four weeks and will reopen in late March.

The right hand turn from Melton Highway onto Gourlay Road will reopen in early March.

For the safety of motorists, pedestrians and our construction workers:

- Modifications to the intersection to enable construction in the median strip of Melton Highway will close right hand turns into Gourlay Road and The Parks at alternate times during works.
- Motorists are advised to use the U-turn 100 metres further down Melton Highway to reach Gourlay Road during right hand turn closures.
- The intersection of Gourlay Road/The Parks will close for up to three weeks in late December. However, we will not be closing the intersection while modifications of the Sanctuary Road roundabout are in affect.

When are the Holden Reservoir Inlet Pipeline works happening?

- **Complete** - site investigation
- **Complete** - site mobilisation
- **Mid 2019-mid 2020** - construction commences and will take approximately 10-12 months to complete.
- **Mid 2020** – commissioning.

We understand these required works can be disruptive and appreciate your patience.

Working hours

Day works take place 7am to 6pm Monday to Friday. On occasions we will be working 7am to 6pm Saturdays. The community will be notified in advance of any work outside the standard hours, or with high community impact.
