Holden Reservoir Pipeline Project

Upcoming night works- road resurfacing of Melton Highway

Melbourne Water is committed to enhancing life and livability in your area. The new Holden Reservoir Inlet Pipeline that we have now built is approximately 4.15 kilometres long. This project was the first phase of a three-part overarching project which will supply high-quality drinking water to Melbourne's growing outer west.

About these works

We will be carrying out **night works** to resurface the road at the Sanctuary Road roundabout on the Melton Highway. These works will be the last of the reinstatement works in the Sanctuary Road roundabout intersection.

Reinstatement will be undertaken in the roundabout intersection and at some exit points (see map).

When

Works are scheduled to occur between **8pm and 7am**. Commencing on **Monday 18 January 2021** and are expected to take up to two nights to complete.

What to expect

- Asphaltting works at night to complete the reinstatement of the road surface
- Lanes will be closed, and detours will be in place while we work on sections of the road (see map)
- Traffic management will be in place to assist motorists, cyclists and pedestrians in the area
- Machinery noise such as reversing beepers from road resurfacing equipment
- Increased street lighting. Lights will be pointed away from residences
- These works must be completed at night when traffic flows are low.

We have a dedicated phone line (1800 931 140) if you require more information.

Location of work

Work will be undertaken on the Melton Highway in the Sanctuary Road roundabout intersection. This will impact on traffic flow and access.

- Vehicles travelling east from Plumpton to Hillside will be detoured at Plumpton Road. Access back onto Melton Highway will be from Taylors Road onto Gourlay Road.
- Vehicles entering The Regency will need to turn right at The Parks or Royal Crescent.
- Vehicles exiting at The Regency will be detoured at King Drive.
- Vehicles exiting at Sanctuary Road will only be able to turn left onto Melton Highway west bound.
- Vehicles turning right from Sanctuary Road onto Melton Highway will be detoured at Beattys Road. Access back onto Melton Highway will be via Aspire Boulevard and Hume Drive onto Gourlay Road.
- Entry and exit into Hillside Corner shopping complex will not be affected.

We thank you for your patience while we complete these works.

Keep up to date with what's happening

For more information about this project or our other activities please call the Holden Reservoir Pipeline team on **1800 931 140** or email holdenreservoirpipeline@melbournewater.com.au or visit www.melbournewater.com.au
