

DSCM Legend

- DSS Boundary
- DS Strategy Boundary
- DSCM Property
- Stage (Allocated)
- Stage (Works in Progress)
- Stage (Finalised)
- Nodes
- Bio-Retention Swale

- Channel
- Cleanout works
- Culvert
- Grassed Swale
- Low flow pipe with Channel
- Overland flow path
- Pipeline
- Soft Engineering

- Bio-Retention Basin
- Buffer Strip
- Inlet/Outlet Structure
- Junction Pit
- Litter trap
- Retarding Basin
- Sediment trap
- Wetland

As Constructed Legend

- Channel
- Natural Waterway
- Sewer Main
- Underground Drain
- Water Main
- Flood Extents
- Lake
- Retarding Basin
- Sediment Trap
- Wetland

Plan Date: April 2017

Melbourne Water is providing this information and it is not to be used as the basis of future design and aspects that the appointed engineering consultant will perform their own calculations as part of requirements for their development.
Please note that schemes developed and Melbourne Water receives additional information, the conceptual advice you have been provided as part of the feasibility report may become outdated. Under the CA process it is the responsibility of the consultant to ensure that Melbourne Water's feasibility advice is current and to verify that all information obtained provided to Melbourne Water for acceptance is correct having completed their own detailed engineering analysis.
Melbourne Water makes no representation or guarantee as to the accuracy or completeness of this information. Any person or group that uses this information does so at their own risk and should make their own assessment and investigations as to the suitability and/or application of the data. Melbourne Water Corporation shall not be held liable in any way to any person or group for loss of any kind including damages, costs, expenses, loss of profits or special loss or damage, arising from any use, error, inaccuracy, incompleteness or other defect in this data.
