

Community Update

August 2023

Church Street Stormwater Drain Rehabilitation

Works are almost complete on the Church Street Stormwater Drain Rehabilitation.

Update on works

The following works are now complete:

- Upgrade to the existing Melbourne Water stormwater maintenance hole near Church Street
- Creation of a new Melbourne Water stormwater maintenance hole near College Street
- Re-lining the section of drain between Church Street and College Street
- Patching sections of the drain between College Street and Connell Street, Hawthorn

In the coming days and weeks we will start:

- Removing site sheds and equipment from Smart Street Reserve
- Patching sections of the drain along Church Street from Smart Street Reserve to Barkers Road, Hawthorn

Reinstatement of Smart Street Reserve

Melbourne Water has been working closely with Council to ensure Smart Street Reserve is reinstated to its pre-existing condition. To ensure establishment of turf, Melbourne Water will be completing reinstatement closer to the spring period- this means there will be a delay between when equipment and site sheds are removed from Smart Street Reserve and when reinstatement takes place.

Melbourne Water will make every effort to minimise impacts to community, however during works you may notice:

- Increased vehicle movements in and out of Smart Street Reserve from Smart and College Street
- Areas of Smart Street Reserve that are not yet reinstated, signage will be in place to inform community
- Melbourne Water personnel accessing the stormwater maintenance hole in Smart Street Reserve closest to Church Street
- Changed traffic conditions along Church Street as we enter the drain to complete patch work, we will keep community informed about traffic impacts

Contact Us

We thank you for your patience as we undertake these works, if you have any questions about the project please call **1800 960 977** or email smallscaleprojects@melbournewater.com.au.

Keep up to date with what's happening
