Melbourne Water is providing our indicative assets information and not to be used as the basis of future design and expects that the detailed engineering consultant will perform their own calculations as part of requirements for their development.

Please note that as schemes develop and Melbourne Water receives additional information, the corresponding advice available here provided as part of the feasibility request may become out-dated. Under the Act, it is the responsibility of the consultant to ensure that Melbourne Water's feasibility advice is current and to certify that all information provided to Melbourne Water for acceptance is correct having completed their own detailed engineering analysis.
