

20 April 2017

Dear Resident,

Williamstown Main Sewer Rehabilitation Project

The project will be accessing manholes on Forster Street, Williamstown, to trial and measure sewer flow controls between **Wednesday 26 April 2017** and **Thursday 27 April 2017** between **7am to 6pm**.

This will involve a small crew accessing manholes along Forster Street to place temporary flow control devices to control and monitor the sewage flow volumes.

Please note plugging sewer mains is a standard practice and will not affect the normal operation of the sewer.

What to expect?

We will take every possible precaution to minimise any impact during these works. Some impacts to our neighbours may include:

- Some odour when the manhole is first opened
- Some noise from the movement of trucks and machinery
- Temporary lane/ road closures and changes to the speed limits near work areas

CPB Black and Veatch Joint Venture will be undertaking these works on behalf of Melbourne Water.

We encourage you to contact us on 1800 813 242 if you have any questions and we thank you for your patience while we undertake these works.
