

Melway Ref. 391 E5

Author: Rebekah Campbell

Scale @ A1 1:7000

**DSCM Legend**

- DSS Boundary
- DS Strategy Boundary
- DSCM Property
- Stage (Allocated)
- Stage (Works in Progress)
- Stage (Finalised)
- Nodes
- Bio-Retention Swale
- Channel
- Cleanout works
- Culvert
- Grassed Swale
- Low flow pipe with Channel
- Overland flow path
- Pipeline
- Soft Engineering
- Bio-Retention Basin
- Buffer Strip
- Inlet/Outlet Structure
- Junction Pit
- Litter trap
- Retarding Basin
- Sediment trap
- Wetland

**As Constructed Legend**

- Channel
- Natural Waterway
- Sewer Main
- Underground Drain
- Water Main
- Flood Extents
- Lake
- Retarding Basin
- Sediment Trap
- Wetland

**Plan Date: April 2017**

Where ever it has been taken in collecting, validating and providing the attached data, Melbourne Water Corporation makes no representation or guarantee as to the accuracy or completeness of this data. Any person or group that uses this data does so at its own risk and shall be liable for any and all costs of any investigation, including damage, costs, interest, loss of profits or speculation or other, arising from the use, error, inaccuracy, incompleteness or other defect in this data.

Melbourne Water is providing our indicative assets information and not to be used as the basis of future design and expects that the responsible engineering consultant will perform their own calculations as part of requirements for their development.

Please note that as schemes develop and Melbourne Water receives additional information, the corresponding advice available here provided as part of the feasibility request may become out of date. Under the SA process it is the responsibility of the consultant to ensure that Melbourne Water's feasibility advice is current and to certify that all information adequately protects Melbourne Water for acceptance as correct having completed their own detailed catchment analysis.
